About

The refurbishment & upgrading of this 210 Room, 4 Star Resort Hotel in the NSW Blue Mountains comprised the refurbishment of hotel bedrooms (including new bathrooms), public areas, conference rooms and refurbishment of some existing furniture and the supply of new furniture.

The contractor closely with the Client and Architect to co-ordinate a fast-track programme to enable the works to be completed as expeditiously as possible with minimal impact on the business as usual whilst the Hotel continued to operate as normal.

Works were programmed and sometimes reprogrammed a number of times to suit the occupancy of the hotel and the use of the conference rooms, meeting rooms and other public areas in the hotel.
