Builder	Base Building - St Hillers Fit Out – WP Projects
Status	Completed 2001

About

Merrylands RSL had been operating on the site for over fifty years and the buildings had been extended and altered many times over.

With a lack of parking and with some parts of the building nearing the end of their serviceable life there was no option but to demolish part of the existing club and begin the reconstruction of a new club. Stage 1 of this programme, provided a new basement loading dock, basement Back of House facilities, second entrance Foyer, bistro, amenities, a three level car park and on grade carparking areas.
